For fixed income the three duration groups are short, intermediate, and long-term, and the three credit quality groups are high, medium, and low quality. These groupings display a portfolio's effective duration and credit quality to provide an overall representation of the fund's risk, given the length and quality of bonds in its portfolio.

Rankings do not take sales charges into account and are based on total return.

A fund's investment objective's, risks, charges and expenses should be considered carefully before investing. The prospectus contains this and other important information about the Fund. To obtain a
